PROFESSIONAL SUMMARY

Data Analyst with experience in data preparation, exploratory analysis, Power BI reporting, and dashboard development. Proficient in Power Query, DAX, Python, and Excel, with foundational SQL skills. Able to transform raw data into clear, actionable insights through structured analysis and visual reporting. Also brings practical exposure to oil and gas terminal operations, operational documentation, work-order tracking, and HSE compliance.

TECHNICAL SKILLS

Data Analytics: Data cleaning and preprocessing; exploratory data analysis (EDA); statistical analysis; hypothesis testing; data validation

Business Intelligence and Reporting: Power BI; interactive dashboards; Power Query; DAX; data modeling; KPI reporting

Programming and Tools: Python (Pandas, NumPy, Matplotlib, Seaborn); SQL (basic querying); Microsoft Excel (Advanced Formulas & Functions, PivotTables, XLOOKUP/VLOOKUP, Data Cleaning, Data Analysis, Conditional Formatting, Data Validation, Dashboard Development, Report Automation, Excel Automation using VBA & Macros, Automated Reporting, Data Visualization, and Dynamic Dashboards with Slicers); web scraping

PROFESSIONAL EXPERIENCE

Project Trainee, Operations Department | Karachi Hydrocarbon Terminal (KHT), a VTTI company
Dec 2025 – Present

- Support terminal operations covering product storage, transfer, loading, and decanting activities.
- Maintain operational records and support Permit to Work (PTW) documentation and work-order tracking.
- Assist with safety-critical equipment monitoring, weight verification, field checks, and compliance with HSE procedures.
- Contribute to terminal improvement initiatives and operational reporting by coordinating field information and documentation.

Data Analyst Intern | Cognifyz Technologies (Remote)
Dec 2024 – Jan 2025

- Conducted exploratory data analysis to identify trends, relationships, and patterns within datasets.
- Cleaned, preprocessed, and validated data to improve quality, consistency, and readiness for analysis.
- Applied Python libraries, including Pandas, NumPy, Matplotlib, and Seaborn, to analyze and visualize data.
- Supported the preparation of analytical reports and visual summaries to inform data-driven decisions.

Power BI Intern | Cognifyz Technologies (Remote)
Sep 2024 – Nov 2024

- Developed interactive Power BI dashboards to monitor key performance indicators and business trends.
- Used Power Query to clean and transform source data for consistent reporting.
- Created DAX measures and supported data modeling to strengthen dashboard analysis and reporting.

PROJECTS

EDA Using Python | Dec 2024

- Conducted exploratory data analysis (EDA) on video game sales data to identify market trends, genre performance, and regional consumer preferences.
- Identified Action and Shooter as leading genres and *Grand Theft Auto V* as the highest-selling title globally, with 19.39 million units sold.
- Regional sales analyzed, highlighting Europe's strong performance with approximately 260 million in reported sales.
- Examined country-specific trends, identifying *Monster Hunter: World* as a notable title in Japan, with 2.17 million sales.
- Investigated sales patterns across 2018–2020 and assessed correlations between North American and European market trends.

Video Game Sales Analysis | Python | Dec 2024

- Analyzed global and regional video game sales to identify market trends, high-performing genres, and geographic differences.
- Used exploratory analysis to examine sales patterns across North American and European markets.

Global Terrorism Trends Dashboard | Power BI | Apr 2024

- Developed a dashboard to analyze terrorism-related data by region, weapon type, and active groups.
- Presented key patterns through visual summaries to make complex datasets easier to interpret.

YouTube Analytics Dashboard | Power BI | Apr 2024

- Built an interactive dashboard comparing YouTube channels using engagement indicators, including likes, comments, and subscribers.

HR Analytics Dashboard | Power BI, Excel | Mar 2024

- Designed a dashboard to review employee satisfaction, performance, and turnover trends.

Mobile Device Analytics Dashboard | Power BI | Mar 2024

- Created a comparative dashboard to explore performance metrics across smartphone brands and models.

Vrindah Store Sales Dashboard | Power BI | Mar 2024

- Analyzed 2022 sales and product performance to identify leading products and key revenue contributors.

EDUCATION

Bachelor of Engineering in Petroleum Engineering

Dawood University of Engineering & Technology, Karachi | Nov 2021 – Jun 2025

HONORS AND AWARDS

Runner-up, Data Visualization Competition — E.ocean Developer | Apr 2024

CERTIFICATIONS

Data Science Foundation — Cisco | Cisco Certified Network Professional (CCNP) | Data Visualization — Award Recognition

LANGUAGES

English (Professional Working Proficiency) | Urdu (Native)
